### INFECTIOUS DISEASE.

#### IMMUNISATION.

During the year 345 children were immunised against Diphtheria for the first time. Two hundred and twenty children received re-inforcing injections.

The usual statistics relating to notifiable infectious diseases are set out in the tables below:—

## MAIDENHEAD MUNICIPAL BOROUGH

## WATER SAMPLES.

Four samples of water were taken from shallow tube wells and submitted for bacteriological examination. All were found to be satisfactory.

## HOUSING STATISTICS.

The record of work done under the Housing Acts, etc. during the past year is as follows:—

1. *Inspection of Dwelling Houses during the Year:*

(1) (a) Total Number of dwelling houses inspected for housing defects (under Public Health or Housing Acts)	...	...	...	...	...	463
(b) Number of inspections made for the purpose	...	...	...	...	...	939
(2) (a) Number of dwelling houses (included under sub-head (1) above) which were inspected and recorded under the Housing (Consolidated) Regulations, 1925, and Amendment Regulations, 1932	...	...	...	...	...	131
(b) Number of inspections made for the purpose	...	...	...	...	...	174

## MAIDENHEAD MUNICIPAL BOROUGH

(3)	Number of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation ... ..	40
(4)	Number of dwelling houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation ... ..	90
2.	<i>Remedy of Defects during the Year without service of Formal Notices:</i>	
	Number of defective dwelling houses rendered fit in consequence of informal action by the Local Authority or their officers ... ..	65
3.	<i>Action under Statutory Powers during the Year:</i>	
A.	<i>Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936:</i>	
(1)	Number of dwelling houses in respect of which notices were served requiring repairs ... ..	Nil.
(2)	Number of dwelling houses which were rendered fit after service of formal notices:	
(a)	By Owners ... ..	Nil.
(b)	By Local Authority in default of Owners ...	Nil.
B.	<i>Proceedings under Public Health Acts:</i>	
(1)	Number of dwelling houses in respect of which notices were served requiring defects to be remedied ... ..	11
(2)	Number of dwelling houses in which defects were remedied after service of formal notices:	
(a)	By Owners ... ..	10
(b)	By Local Authority in default of Owners ...	1
C.	<i>Proceedings under Sections 11 and 13 of the Housing Acts, 1936:</i>	
(1)	(a) Number of dwelling houses in respect of which Demolition Orders were made ... ..	10
	(b) Local Government (Miscellaneous Provisions) Act, 1954. No. of dwelling houses in respect of which closing orders were made ... ..	1
(2)	Number of dwelling houses in respect of which Undertakings were accepted ... ..	Nil.

## MAIDENHEAD MUNICIPAL BOROUGH

D. *Proceedings under Section 12 of the Housing Act, 1936:*

- |  |                             |
|--|-----------------------------|
| (1) Parts of buildings in respect of which closing orders were made ... ..                     | 2<br>(3 underground rooms). |
| (2) Number of underground rooms in respect of which Undertakings were accepted ... ..          | Nil.                        |
| (3) Number of underground rooms rendered fit for habitation and Undertakings determined ... .. | Nil.                        |
| (4) Parts of buildings in respect of which Undertakings were accepted ... ..                   | Nil.                        |

4. *Housing Act, 1936. Part IV—Overcrowding.*

No statutory action has been taken.

5. *Housing Act, 1936. Section 25—Clearance Area.*

A row of 52 back-to-back houses at Garden Cottages was declared a Clearance Area.

## MOVEABLE DWELLINGS.

An extension to the Municipal caravan site at Brownfield Gardens (formerly known as the Larchfield Estate caravan site) became available for occupation during September and provided accommodation for an additional 28 caravans.

A start was also made on reducing the number of caravans on the Tyrrells Buildings site which the Council have decided to develop for other purposes.

As the following table indicates, the total number of caravans stationed in the Borough has increased by seven, but the number of applicants, with local connections, who are waiting for vacancies on the municipal sites, shows no sign of diminishing and it is anticipated that the Council will consider a further extension of the Brownfield Gardens site during the coming year.

Strict supervision is exercised over all caravans and caravan sites in the Borough and 637 visits and inspections were made during the year by the sanitary inspectors. Contraventions of licensing conditions and site rules were chiefly minor in character and quickly rectified.

## MAIDENHEAD MUNICIPAL BOROUGH

The four samples of milk which failed to pass the phosphatase test were taken from the pasteurising plant at a local dairy.

An investigation into the cause of these failures revealed that during diversion, drops of unpasteurised milk occasionally splashed from the flow diversion trough into the cooling section of the plant and accumulated sufficiently during a prolonged diversion to give an unsatisfactory phosphatase reading.

Prolonged tests were carried out by the manufacturers of the plant, an adjustment was made to the diversion trough actuating arm, and a new type of diversion trough was fitted.

These alterations appear to have eliminated the splashing and all samples taken subsequently have been satisfactory.

### BIOLOGICAL EXAMINATION OF MILK SAMPLES FOR PRESENCE OF TUBERCLE BACILLI.

One sample of milk was submitted for biological examination.

The report indicated that the milk was not infected with Tubercle Bacilli.

### ICE CREAM.

#### NUMBER OF REGISTERED PREMISES :

(a)	For manufacture	...	...	2.
(b)	For sale	...	...	82.

#### BACTERIOLOGICAL EXAMINATION OF ICE CREAM SAMPLES.

The results of eighty-three samples submitted for bacteriological examination during the year are given in table 1 below.

Table II indicates the comparative results over the last three years, with the totals of Grades 1 and 2 results expressed as percentages.

TABLE I.

Public Health Laboratory Service Grading			
<i>Grade 1</i>	<i>Grade 2</i>	<i>Grade 3</i>	<i>Grade 4</i>
67	16	Nil	Nil

## MAIDENHEAD MUNICIPAL BOROUGH

TABLE II.

Year	No. of Samples	Public Health Laboratory Service Grading				Percentage of total samples falling into Grades 1 and 2.
		1	2	3	4	
1952	69	5	47	14	3	75.4%
1953	78	7	64	3	4	88.5%
1954	83	67	16	Nil	Nil	100%

The number of premises registered for the sale of Ice Cream decreased by six during the year, as against an increase of nine in 1953 and an increase of twenty-one during 1952.

## REGISTERED FOOD PREMISES AND FOOD BYELAWS.

Routine inspections have been made of all registered food premises and special attention has been given to the requirements of the byelaws relating to the handling and wrapping of food at all food premises.

The standard maintained has, in general, been very satisfactory.

## BAKEHOUSES.

A satisfactory standard has been maintained in the 17 bake-houses in the Borough. A total of 43 inspections was made during the year.

## FOOD INSPECTION AND UNSOUND FOOD.

A total of 180 visits have been made for the primary purpose of inspecting food sold or intended for sale, including inspections at school canteens.

The following table gives the amount of foodstuffs from various premises in the town which were condemned, surrendered and disposed of, after being examined and found to be unfit for human consumption.

The sampling of milk in course of delivery was undertaken with the ultimate object of sampling all sources of supply to Maidenhead dairies. This has now been completed.

Details of the 25 samples reported by the Public Analyst as being adulterated are given in the following table:—

RAG FLOCK.

Three premises are registered under Section 2 of the Rag Flock and Other Filling Materials Act, 1951, all of which are small factories in which upholstered furniture is made.

A formal sample of woollen mixture flock was taken at one of these premises and the sample was found on analysis to be of a satisfactory standard.

SWIMMING POOL.

Four samples of water from the Council's swimming pool where the water undergoes continuous filtration and chlorination, were submitted for bacteriological examination. All of the samples were satisfactory.

NUISANCE FROM TIPPING OF REFUSE IN WATER.

Reference was made in the report for last year to a serious nuisance from smell which arose from the wet tipping of trade

## MAIDENHEAD MUNICIPAL BOROUGH

waste into worked-out gravel pits and to the success of the action taken to deal with the nuisance.

Tipping operations and the condition of the water continued to be closely supervised during the year under review and no further complaint has been received or nuisance experienced.

Work has proceeded on the division of the larger pit into three lagoons and one barrier has already been completed, several thousand tons of clean material having been used for the purpose.

The condition of the water itself had improved to such a degree that it was possible to discontinue pumping operations in September. Subsequent analyses have indicated that the improvement in the condition of the water has been maintained.

Whilst the possibility of further nuisance will not be entirely eliminated until the wet tipping stage has been completed, I feel confident, in the light of recent experience, that efficient control can be exercised over these operations in such a way as to reduce future risk to negligible proportions.

Experimental work under similar circumstances carried out in another part of the country has demonstrated the effectiveness of adding chromate to the water in order to counteract nuisance.

Chromate has been shown to have an inhibiting effect on the sulphur reducing organisms but its use is not recommended where there is danger of polluting water supplies. This fact precludes its use in connection with our own problem, where the water level fluctuates with the rise and fall of the subsoil water level.

F. G. BISHOP,

*Chief Sanitary Inspector.*

# Wokingham

REPORT OF THE CHIEF SANITARY INSPECTOR.

SUMMARY OF SANITARY INSPECTIONS.

NOTICES.

No. of informal notices served during the year ... ..	55
No. of notices outstanding from 1953 ... ..	113
No. of informal notices complied with during the year ...	149
No. of informal notices outstanding at end of the year ...	17
No. of formal notices served during the year ... ..	21
No. of formal notices complied with during the year ...	22
Work carried out by Local Authority in default ... ..	Nil.
No. of formal notices outstanding at end of the year ...	5

HOUSING.

GENERAL INFORMATION.

No new houses were completed by the Council but work was commenced on 70 new traditional houses on the Norreys Barn Estate.

In the same period 78 houses were completed by private enterprise.

## WOKINGHAM MUNICIPAL BOROUGH

## HOUSING STATISTICS.

1. *Inspection of Dwelling Houses during the year:*

(1) (a) Total Number of dwelling houses inspected for housing defects (under Public Health or Housing Acts) ... ..	79
(b) Number of inspections made for the purpose ...	198
(2) (a) Number of dwelling houses (included under sub-head (1) above) which were inspected and recorded under the Housing (Consolidated) Regulations, 1925, and Amendment Regulations, 1932 ... ..	Nil.
(b) Number of inspections made for the purpose ...	Nil.
(3) Number of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation ... ..	6
(4) Number of dwelling houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation ... ..	73

2. *Remedy of Defects during the Year without service of Formal Notices:*

Number of defective dwelling houses rendered fit in consequence of informal action by the Local Authority or their officers ... ..	34
--	----

3. *Action under Statutory Powers during the Year:*

## A. Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936 :

(1) Number of dwelling houses in respect of which notices were served requiring repairs ... ..	Nil.
(2) Number of dwelling houses which were rendered fit after service of formal notices:	
(a) By Owners ... ..	Nil.
(b) By Local Authority in default of Owners ...	Nil.

## WOKINGHAM MUNICIPAL BOROUGH

## B. Proceedings under Public Health Acts:

REPORT OF THE CHIEF SANITARY INSPECTOR.

WATER SUPPLIES.

The following list shows the number of houses in the Rural District that are served by either a piped water or a well supply. The list is sub-divided giving the number per Parish.

<i>Parish.</i>	<i>Total Houses.</i>	<i>On Main.</i>	<i>On Well.</i>
Bisham — —	304	296	8
Bray — — —	1,185	1,173	12
Cookham — —	1,287	1,140	47
Hurley — — —	517	489	28
Shottesbrooke —	41	41	—
Waltham			
St. Lawrence	364	363	1
White Waltham	525	525	—

No houses in the District draw their water from open shallow wells.

The water from the houses on a well supply is regularly sampled and sent to the Public Health Laboratory at Reading. The results are summarised as follows:—

Satisfactory	...	54.
Unsatisfactory	...	14.

Two samples were taken for chemical analysis and both samples were reported on as satisfactory.

## (3) HOUSING

## GENERAL INFORMATION

The Council's allocation of houses for 1954 was 50 units of accommodation supplemented by a further 20 units granted in October, 1954 to be used solely for accommodating families living in hutted camps.

Private house building showed an expected increase during the year and, to meet requirements of prospective house owners, the Council's mortgage business showed an increase.

New housing in the development of a New Town of Bracknell is set out in detail in the Annual Report of the Bracknell Development Corporation.

## (5) SANITARY MATTERS REQUIRING ATTENTION.

There are no outstanding problems of sanitation in the Rural District Council's area requiring urgent attention. Problems there are but these will largely be dealt with in the general policy of the Council—such as expansion of sewers, housing and slum clearance, and problems arising from the Development of a New Town in the middle of a Rural District.

## WINDSOR RURAL DISTRICT

## HOUSING.

## GENERAL INFORMATION

## NEW BUILDINGS.

Dwellings completed during the year are listed hereunder:—

By Local Authority ... ..	98
By Private Enterprise ... ..	286

In addition to the above, 11 dwelling units were provided by private enterprise conversion (1 with the aid of grant) and 11 existing dwellings were improved and modernised with Grant aid.

## SLUM CLEARANCE.

An initial survey was carried out for the purpose of estimating the number of houses to be dealt with under Slum Clearance during the next 5 years and 57 premises were listed. To these 23 premises, previously deemed to be unfit were added, making a total of 80, which constitutes the Council's 5 year programme. In submitting these figures the Council were advised that additions and deletions were likely to be necessary during the 5 years, but that the submission represented a global picture of the position as called for by Circular No. 55/54 Part I Para. 5.

## CERTIFICATES OF DISREPAIR, HOUSING REPAIRS &amp; RENTS ACT 1954.

Two applications for certificates were applied for and, following inspection of the properties, duly granted.

## TEMPORARY ACCOMMODATION.

99 temporary hutments at Cheapside and 10 at South Ascot still in use by the Council, require constant attention by way of inspection and repairs. In many instances the life of the building is prolonged by constant "patching." 12 such dwellings have been included in the Council's Slum Clearance programme. The Health Department is responsible for external repairs and maintenance of all permanent, temporary and requisitioned dwellings, the total number of which is now 727 and it should be noted that work in this connection is not reflected in the figures given elsewhere in this report, relative to "visits," "inspections," etc.

WINDSOR RURAL DISTRICT  
HOUSING STATISTICS.

1. *Inspection of Dwelling Houses during the Year:*

## FOOD INSPECTION.

## MILK.

The following tables show dairies registered (other than Dairy Farms) and their disposition for the Sale of raw and designated milk:—

	Total Licences Issued	T.T.	LICENSED TO SELL:		Sterilised
			Accredited	Pasteurised	
*Registered Dairies ...	4	—	—	—	—
Distributors of Milk ...	11	—	—	—	—
Licensed Dealers ...	12	4	—	5	3
Supplementary Licence Holders ...	10	5	—	5	—

\* Included in "Distributors."

39 samples of milk were submitted for keeping quality and heat treatment tests during the year under review, and the results are shown in the following table. In cases of failing samples, repeat samples are taken and where the source of supply is known, appropriate notification is given to the Authority concerned. A special point is made of periodically sampling Milk supplied to Schools, and in all cases, these have proved satisfactory.

Test	TUBERCULIN TESTED		PASTEURISED ORD.		PASTEURISED T.T.		STERILISED	
	Satis- factory	Failed	Satis- factory	Failed	Satis- factory	Failed	Satis- factory	Failed
Methylene blue (keeping quality) ...	3	1	23	—	10	—	—	—
Phosphatase (heat treatment) ...	—	—	23	—	10	—	—	—
Turbidity Test ...	—	—	—	—	—	—	2	—

As from December 2nd, 1953, Windsor Rural District became a specified area, under the Milk (Special Designations) (Specified Areas) (No. 2) Order 1953, in which only Designated Milk may be sold.

## WINDSOR RURAL DISTRICT

## ICE CREAM.

There are no Ice Cream Manufacturers in this District, but 28 premises are registered for the sale of this commodity.

Ten samples of Ice Cream were taken during 1954, and the results, classified under the Provisional Grades, are as follows:—

No. of Grade 1 Samples ...	...	9
No. of Grade 2 Samples ...	...	1

Suppliers are duly notified of the results of the examination.

*Note:* In 1938 a Sub-Committee of the Public Health Laboratory Service suggested that no less than 50% of a vendor's samples should fall into Grade 1, 30% into Grade 2, and not more than 20% into Grade 3 and none into Grade 4.

## MEAT INSPECTION—SLAUGHTERHOUSES.

Under the Slaughterhouses Act 1954, the Council were responsible for seeing that sufficient slaughtering accommodation was available, from July 1954, and for a period of not less than 3 years, for the needs of their District. With this in mind, Licences were issued during the year, in respect of 3 Slaughterhouses. Up to December only 2 of these had been used, and it is safe to say that 90% of the carcase meat from the animals slaughtered was not consumed in Windsor R.D., but marketed in London and elsewhere. The Licences issued were for a limited period, expiring in December, 1954.

The total number of animals killed and inspected between July and December was:—

Bullocks	...	...	...	2
Pigs	...	...	...	178
Sheep	...	...	...	11
Calves	...	...	...	38

247 lbs. of carcase meat and 13 lbs. of offal was condemned as unfit for human consumption.

## UNSOUND FOOD.

The following articles of food have been examined, voluntarily surrendered and disposed of as being unfit for human food, during the year:—

## WINDSOR RURAL DISTRICT

<i>Canned Products:</i>			
Milk	...	...	14 tins
Meat	...	...	10 tins
Fish	...	...	10 tins
Jam	...	...	3 tins
Fruits	...	...	30 tins
Vegetables	...	...	3 tins

<i>Fresh and Cured Products:</i>			
Meat	...	...	569 lbs.
Fish	...	...	90 lbs.
Poultry	...	...	222 lbs.

<i>Dried Products:</i>			
Cheese	...	...	10 lbs.

## HAWKERS OF FOOD AND THEIR PREMISES.

Section 122 of the Berkshire County Council Act 1953 requires Local Authorities in the County to register all Hawkers of Food trading in their areas.

The Race Meetings at Ascot attract a large number of these traders, and at the 1954 Meetings particulars affecting registration were supplied to 30 traders, who were subsequently registered.

No provision is made for refusing registration, unless it appears to the Local Authority that the public health is or is likely to be endangered by any act or default of the person who has applied to be registered. In other words an applicant is almost bound to be registered on application, and his or her fitness to be a food handler, learned by experience.

## LABORATORY FACILITIES.

Laboratory services for the bacteriological examination of specimens and samples of food and drink in connection with infectious disease, or as a potential source of such, are available at the Public Health Laboratory, Battle Hospital, Reading.

Chemical analysis of water and sewage are carried out by Thos. McLachlan & Partners, Reading.

## WATER.

The water supply for this district has been described in previous Reports. It is controlled by the South West Suburban Water Co., who draw from the river Thames at Staines. The area of supply embraces approximately 100 square miles and a population of 185,000, the average daily quantity abstracted from the river is approximately 5 million gallons. In addition to this, an agreement exists for a bulk supply to be taken from the Metropolitan Water Board. The estimated average daily consumption per head of population is 29 gallons.

## WINDSOR RURAL DISTRICT

A piped supply exists throughout the District except at Friary Island in the Parish of Old Windsor, where shallow tube wells are in use, supplies from which are periodically sampled with satisfactory results.

The well water supply to a large educational Establishment referred to in the Report for 1953 at Page 94 was improved, during the year under review, by alteration to the service pipes, renewal of pumps, and rendering the upper part of the well structure. Routine samples from the supply continue to be taken and have been satisfactory.

During the year 6 samples were taken from the Public Supply in this District and 8 from well supplies.

A typical analysis of (a) raw river water and (b) treated water as supplied to the Public, is appended:—

ANALYSIS OF A SAMPLE OF WATER RECEIVED 14/9/54 FROM  
SOUTH WEST SUBURBAN WATER COMPANY.

Labelled Works Intake, River Thames, Staines

Date: 14. 9. 54. 9.30 a.m.

*Chemical Results in Parts per Million.*

Appearance: Slight opalescence with a distinct flocculent deposit.  
Microscopic examination shows amorphous mineral and organic debris, diatoms, chlorophyceae, protozoa.

Colour—filtered ... .. 20	Turbidity ... .. 5

Cl. Welchii Reaction :—  
                  10 ml.                      1 ml.

\* Intermediate Type 1.

This sample is only slightly opalescent in appearance. Microscopic examination shows the presence of a number of low forms of life normal to surface waters. The water has a reaction on the alkaline side of neutrality and is free from metals apart from a minute trace of iron. It is hard in character but its hardness and its content of mineral and saline constituents in solution are not excessive. It is of satisfactory organic quality and bacterial purity for a river water.

These results are indicative of a water amenable to treatment for public supply purposes.

## ANALYSIS OF A SAMPLE OF WATER RECEIVED 14/9/54

FROM SOUTH WEST SUBURBAN WATER COMPANY:

Labelled Tap in Old Filter House, The Causeway, Staines.

Date: 14/9/54. 9.45 a.m.

This sample is clear and bright in appearance, has a reaction slightly on the alkaline side of neutrality and is free from metals. The water is hard in character but its hardness and its content of mineral and saline constituents in solution are not excessive. Its organic quality and bacterial purity are of a high standard.

These results are indicative of a water which is pure and wholesome in character and suitable for public supply purposes.

## SANITARY MATTERS REQUIRING ATTENTION.

## SEWERING OF EARLEYDENE ESTATE, SUNNINGDALE.

This is referred to at page 105 of the Report for 1953 and was previously referred to at page 90 in the 1950 Report. It is submitted that serious attention should again be given to providing main sewers to serve this Estate, which comprises 16 detached dwellings now drained to various types of septic tanks without adequate effluent disposal.

There are some 46 properties, including the above mentioned Estate, in the sewered parts of the District which are not connected to the main sewers by reason of their siting, but it is hoped that Grants now available for such work may induce owners to take steps to connect their premises where gradients allow.

## PUBLIC CONVENIENCES.

The provision of public Sanitary Conveniences at Ascot, referred to at page 105 in the Report for 1953, progressed still further during the year under review, and by the time this Report is in print, the conveniences will, in all probability, be in use. There now remains the Parish of Old Windsor, in which conveniences for the use of the public are due to be provided. Prior to the sewerage of the parish this matter presented some difficulties, but it should now be considered as a sanitary matter requiring attention.

WINDSOR RURAL DISTRICT

PROVISION OF SEWERS IN THE PARISH OF  
OLD WINDSOR.

The Sewerage Scheme for the Parish of Old Windsor was completed in July 1954, and during the remainder of the year 438 premises were connected. This occasioned a considerable amount of work for the Department in the examination of plans and inspection of work, but it was gratifying to note the response of so many householders to the information and "Advice Circulars" sent to them.

So far the matter of requiring connections has been dealt with as informally as possible but the Council have powers under Section 94 of the Berks County Council Act 1953, to require the connection of house drains to main sewers where these have been provided.

W. H. ROWSELL,  
*Chief Sanitary Inspector.*

REPORT ON THE WATER SUPPLY BY THE  
WATER ENGINEER.

The volume of water produced during the year from the Council's two sources was 409,045,000 gallons and the total mileage of mains is now 139.43, an increase of 3.43 miles. New connections to mains supply numbered 426.

The year has been a busy one with numerous small main extensions for new housing with a correspondingly increased demand for new services and tappings.

The most notable improvement in the distribution of water has been the laying of a new 6" dia. main from Farley Hill Water Tower to link with the existing 6" dia. main near Swallowfield Village. This work has enabled greatly improved supplies to be furnished in the Swallowfield and Riseley districts where pressure formerly failed in hot weather during the hours of peak demand. The improvement has, however, thrown a considerable strain on the small pumps at Arborfield Boosting Station which supplies the Farley Hill Tower and new pumps of greater capacity will have to be installed.

The general distribution system throughout the district is to be reviewed in order to investigate the adequacy of the existing trunk mains to cope with future increases in water consumption. Three recording meters will be required for installation on trunk mains for the purpose of this investigation.

Mention was made in the report for 1953 of the need for augmentation of the Council's resources by further capital works,

## WOKINGHAM RURAL DISTRICT

and investigations and consideration of this problem are still proceeding.

G. DANIELL,

*Chief Engineer.*

## SEWERAGE AND SEWAGE DISPOSAL.

The good progress in the laying of the sewers for part of the Woodley area was unfortunately not maintained and it is only now possible to report that the scheme will soon be sufficiently far advanced for connections to be made to the sewers. The Loddon Bridge Pumping Station and the Marsh Farm Sewage Disposal Works are, however, almost ready to be put into use; disposal of sewage from the Mill Lane area by irrigation on the Gipsy Lane site will then cease and the site will be transferred to the Chief Sanitary Inspector for use exclusively for the disposal of cesspool sewage. It should, therefore, not now be long before the temporary disposal sites at B.C.M. Estate, Woodley School; Blasketts, Fosters Lane; and Cooks Estate, Warren Road, can be dispensed with by connecting to the public sewers.

It is anticipated also that the sewerage scheme for the Pine-wood Area of Wokingham Without will be available for connection by August 1955.

It is satisfactory to record that Government approval to the extension of the Woodley Contract with Messrs. W. & C. French, Ltd. has been granted and that the work of laying the subsidiary sewers can be commenced.

A contract has also been entered into for the construction of the second stage of the Marsh Farm Sewage Disposal Works and work has commenced on this.

The Parrot Farm Sewage Works at Shinfield has continued to cause anxiety and difficulty in maintaining an effluent up to the standard required by the Thames Conservancy but it is thought likely that the construction of the Shinfield Pumping Station and outfall sewer to Marsh Farm will receive Government sanction. The completion of this portion of the Shinfield Main Drainage Scheme will enable the Parrot Farm Works to be dispensed with.

G. DANIELL,

*Chief Engineer.*

## WOKINGHAM RURAL DISTRICT

## REPORT OF THE CHIEF SANITARY INSPECTOR.

## WET SCAVENGING.

1954 was probably the worst year we have had for some time from the rainfall aspect which has a great bearing on the calls upon this service.

The following table shows the disposal at the various sites in the Rural District and it is notable that due to the rainfall the amount tipped on fields is less, and similarly Gipsy Lane Site has had to take more, due to the fact that we have not been able to tip in the Shinfield area during the wet summer.

Site.	1953/54.	1954/55.
Gipsy Lane ... ..	1,289,650	3,760,500
Colemansmoor ... ..	4,233,625	3,045,200
Twyford ... ..	1,840,825	1,725,250
Winnersh ... ..	1,682,275	2,347,770
Wokingham Borough Sewers ...	816,575	1,513,875
Fields, etc. ... ..	5,638,600	4,297,300
	<hr/> 15,501,550	<hr/> 16,689,895

The most pleasing factor with this service is that although the number of crews and vehicles employed has been reduced by one, compared with the previous year, the amount of sewage disposed of is greater. This has been due to the efficient operation of the fleet which now includes five oil engined S.D. cesspool emptiers.

Main sewerage is being dealt with in the more urban parts of the area but cesspool emptying will remain a problem for many years to come. What was considered the Rural parts of the district has now been developed more and more, and in a number of these areas there is no likelihood of main drainage for many years to come. During the year over 15,000 properties have been dealt with and the Council's scheme gives a rate borne emptying upon application not more frequently than once in every eight weeks.

## DRY SCAVENGING.

The rapid growth of this district throws a direct increase on the work of refuse collection and disposal. The Council have throughout the year maintained in all the Parishes a weekly kerb-side collection and the number of lorries engaged whole time on this work is now six, with one vehicle in reserve. The biggest problem facing the Council at the present time are disposal sites, and attempts are being made to obtain a large site at Woodley which is ideal in relation to the size of the district and will permit

## WOKINGHAM RURAL DISTRICT

the use of mechanised handling for disposal.

Durng the past year 5,000 yards of refuse more than in the previous years have been disposed of. This is of course more than the percentage increase due to new properties and is largely accounted for by the fact that the Council are now taking in refuse from the two large military establishments in the area.

## SALVAGE DISPOSAL.

The market for salvage materials is now improving. During the past year 272 tons of salvage material was disposed of, a reduction of 9 tons on the previous year. The receipts, however, were £150 more at £1,860.

The Council operated a bonus scheme for their employees, which in the past year amounted to £144.
